Re: BEVERAGE-AIR EARNS 2023 ENERGY STAR® PARTNER OF THE YEAR AWARD

Beverage-Air is proud to announce that it has received the 2023 ENERGY STAR PARTNER OF THE YEAR Award from the U.S. Environmental Protection Agency and the U.S. Department of Energy.

As we continue our commitment to design one of the most robust, energy-efficient product offerings within the refrigeration market, we're proud to be presented with an ENERGY STAR award for the third straight year. With over 180 ENERGY STAR certified models, this award proves our hard work and dedication to environmental solutions is paying off.

"As we accelerate historic efforts to address climate change, public-private partnerships will be essential to realizing the scale of our ambition," said EPA Administrator Michael S. Regan. "I applaud this year's ENERGY STAR award winners for working with EPA to deliver a clean energy future that saves American consumers and businesses money and creates jobs."

Each year, the ENERGY STAR program honors a select group of businesses and organizations that have made outstanding contributions in the transition to a clean energy economy. ENERGY STAR award winners lead their industries in the production, sale, and adoption of energy-efficient products, homes, buildings, services, and strategies. These efforts are essential to fighting the climate crisis, protecting public health, and creating a clean energy future for everyone.

Winners are selected from a network of thousands of ENERGY STAR partners. For a complete list of 2023 winners and more information about ENERGY STAR's awards program, visit energystar.gov/awardwinners.

Sincerely,

Will Means
President
Ali Group North America—Refrigeration Division
